

Playing with Density

Spelenderwijs omgaan met chemie

Bedrijfsvoorstelling

LuGus Studios en het ETN-Charming project

Waarom?

Waarom dit project en dichtheid?

Het experiment

- Ontwerp
- Oculus Integration SDK
- Interacties
- Tijdsbesteding
- Demo

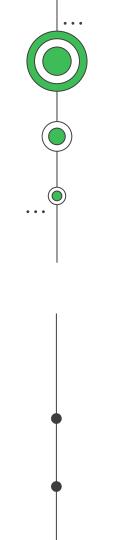

Conclusie

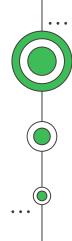

Korte reflectie en conclusies

Inhoudstabel

"Serious about Games"

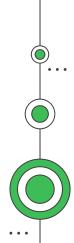

ETN-Charming

"European Training Network for Chemical Engineering Immersive Learning"

Sanne van Loenen

Waarom dit project?

LuGus Studios

- Developing in Unity
- Interesse student

. . .

Eigen interesse

- Wetenschap
- Sociale waarde
- Gaming

• • •

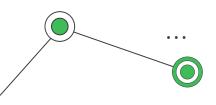

Uitdaging

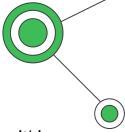

- Werken met nieuwe technologie
- Virtual Reality

. . .

Doelstellingen

"Within the timespan of 10-15 minutes, what steps can we let children between the ages of 10-14 take within a virtual experiment to give them an abstract understanding of the concept of density."

01

In Unity

Developing gebeurt binnen Unity, een framework voor Game Development in C# 02

Voor kinderen

Doelgroep van het experiment zijn kinderen tussen 10 en 14 jaar in Vlaamse scholen

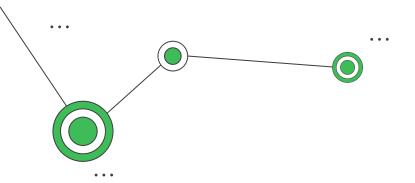

03

Virtual Reality

Maak gebruik van de Oculus Quest 2 en handtracking 04

Fun

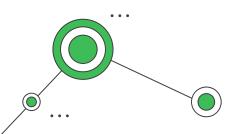

Kinderen een interactieve, leuke ervaring bieden

"There are as many applications for VR as you can think of, it's restricted by your imagination"

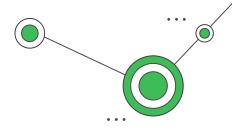

–Palmer Lucky

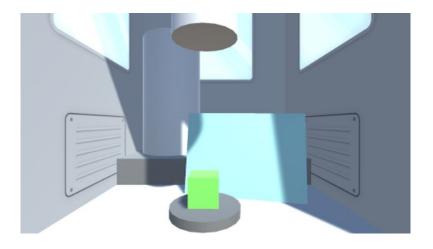

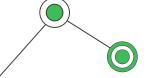

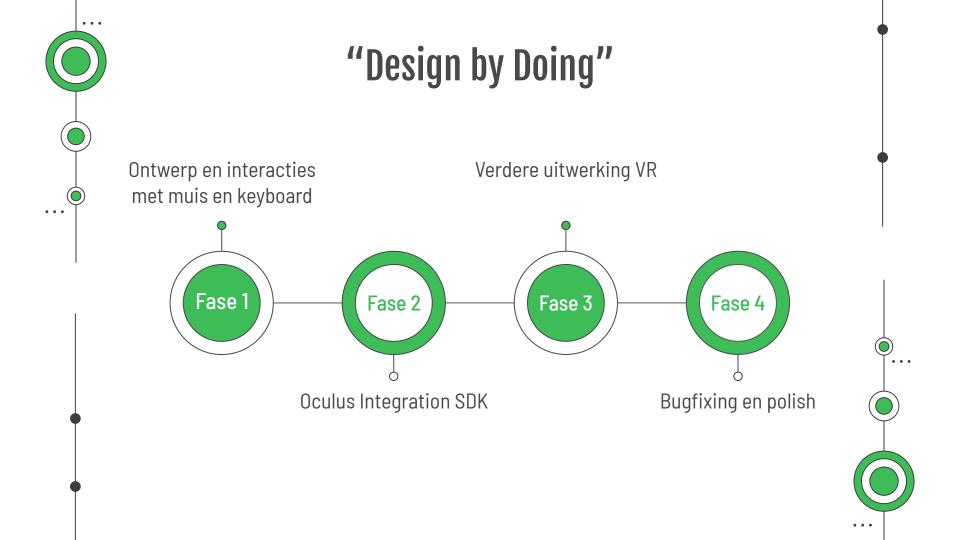

- Literatuurstudie
 - Welke interacties/handelingen zijn nodig binnen het experiment?
- Uitwerken van interacties op basis van muis en keyboard
- "Design by doing"

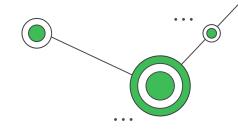

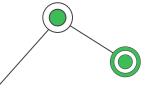

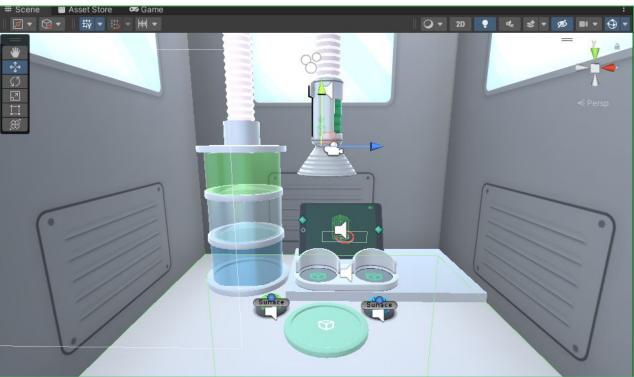

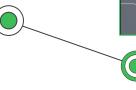

- SDK = Software Development Kit
- Kit die de integratie van Virtual Reality binnen Unity versimpeld
 - "Interactors" en "Interactables"
- Nieuwe SDK
 - Geen of weinig documentatie
 - Systemen werken niet altijd optimaal

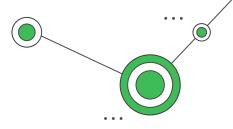

Interacties

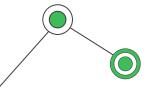

Tijdsbesteding

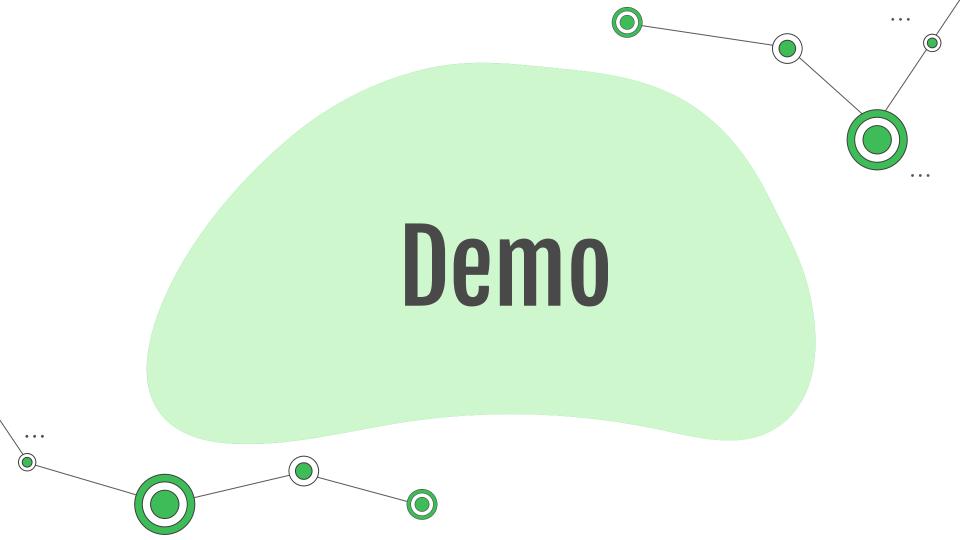

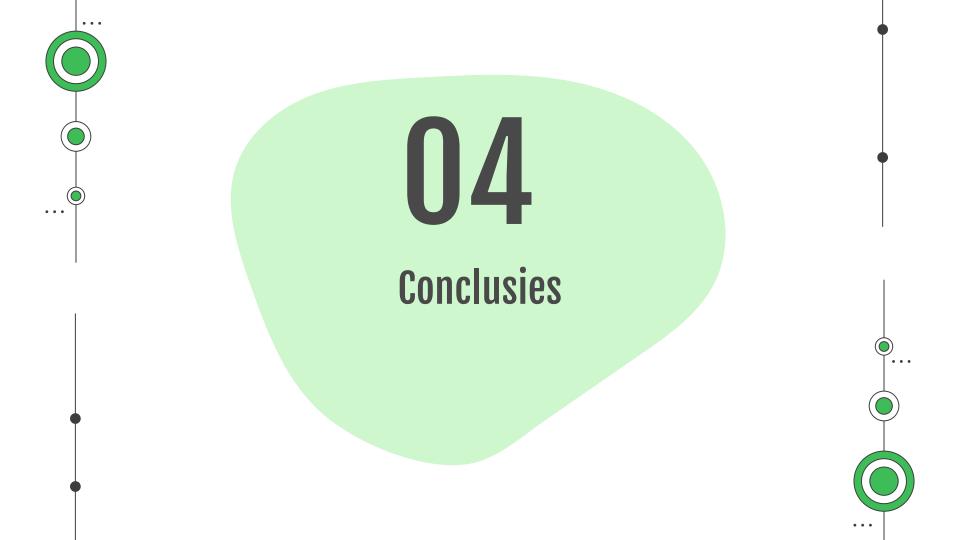

- Geschatte tijdsbesteding → 126 uur
- Uiteindelijke tijdsbesteding → 194 uur

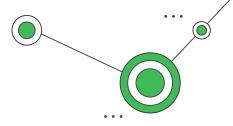

- Testen in real life environment
- Combinatie van handelingen en uitzicht van het experiment zou de originele doelstellingen moeten bereiken
- Sommige handelingen verder uitwerken

Reflectie

- Betere developer geworden
- Werken voor een klant
- Meer zelfvertrouwen
